

# HVH Instructions to connect Electric Piano

1. **Locate:** adapter box A; long lead with 6mm Jack plugs B; short lead with 3pin plugs C (all usually in amplifier unit drawer).

2. **Position piano** – RHS of stage or auditorium is best (this is a quality instrument so please treat with care - lift not drag).
3. **Plug** - long lead B into 'line out' socket on piano and 'input' on box A.

4. **Place box A** near 6 mic input box D and connect with 3pin Mic lead C to channel 3. The lectern is a good place to sit Box A.
5. **Turn on amplifier** (see other instructions). Turn on piano and play. Adjust volume using master volume slider and volume control on piano. Channel 3 slider may also need adjustment.
